

## Importing an Eclipse Project

1. Go to: File > Import
2. Click “Existing Projects into Workspace”
3. Click “Next”

4. Select “Select archive file”
5. Browse and select the file “COMP30820\_Case-Study.zip” (i.e. the zip file you downloaded from Moodle)
6. Click on Finish
7. Done – the project should now be imported.

**Import Projects**

Select a directory to search for existing Eclipse projects.

☐ Select root directory:

☒ Select archive file:

**Projects:**

<input checked="" type="checkbox"/>	COMP30820 Case Study (COMP30820 Case Study/)	<input data-bbox="1145 925 1316 958" type="button" value="Select All"/>
		<input data-bbox="1145 992 1316 1025" type="button" value="Deselect All"/>
		<input data-bbox="1145 1059 1316 1093" type="button" value="Refresh"/>

**Options**

☒ Search for nested projects

☒ Copy projects into workspace

☐ Close newly imported projects upon completion

☐ Hide projects that already exist in the workspace

**Working sets**

☐ Add project to working sets

Working sets:
